

ANNOUNCEMENT NO. 229 - 3 November 2022

INTERIM REPORT THIRD QUARTER 2022

KEY POINTS

THIRD QUARTER 2022

Results

- USD 243 million profit for the third quarter of 2022.
- Profit for the quarter split across:
 - Assets & Logistics: USD 53 million.
 - Freight Services & Trading: USD 190 million.
- USD 539 million profit for Q1-Q3 (earnings per share of DKK 107).
- Return on equity:
 - 64% in the third quarter of 2022.
 - 58% in the first nine months of 2022.

Business highlights

- Freight Services & Trading captured significant value in both dry and tankers during the quarter, generating a profit of USD 190 million.
- Net asset value (NAV) of Assets & Logistics (including NORDEN's cash position) increased DKK 69 per share to DKK 446 during Q3. Increase driven primarily by higher tanker values.
- Dry cargo earnings generated from a short position (more cargoes than tonnage), profitable cover contracts and asset sales.
- Tanker earnings generated through high exposure as tanker rates surged. Earnings further boosted through arbitrage trading across regions.
- Gradually starting to cover high tanker exposure and have neutralised our dry cargo position for 2023 across both business units.

Guidance

- NORDEN expects profit for the year in the range of USD 650-730 million, in line with announced guidance in early October.
- The Board has decided to pay out an interim dividend of DKK 30 per share to be distributed to shareholders on 9 November.
- In addition, NORDEN will initiate a share buyback programme of USD 50 million, which will run until February 2023.

“NORDEN’s third quarter net profit of USD 243 million and 64% return on equity is a testimony to our unique trading model. During the quarter, NORDEN generated high dry cargo earnings in a weakening market. In addition, our large exposure to tankers enabled NORDEN to capitalise on surging tanker rates. As we head towards 2023, we expect to continue to benefit from our large exposure to tankers while profiting from a fully covered dry cargo portfolio. This positions NORDEN to continue to deliver strong returns to our shareholders”.

CEO Jan Rindbo

¹⁾ The Energy Efficiency Operational Indicator (EEOI) is a measurement of efficiency and is defined as the amount of CO₂ emitted per tonne of cargo transported 1 mile. The calculation of EEOI has changed as of FY2021 onwards, and now also includes vessels and voyages on T/C-out to third parties. Previously, only own voyages were included. Quarterly figures for 2021 have therefore not been restated.

²⁾ Lost Time Injury Frequency (LTIF) is the frequency a seafarer is unable to work for more than 24 hours per 1 million working hours. NORDEN has worked closely together with technical management partner Synergy Marine Group to ensure safety onboard our vessels and makes continuous efforts towards safe working practices during all aspects of the operations.

³⁾ Converted at the USD/DKK rate at end of period.

⁴⁾ The ratios were computed in accordance with "Recommendations and Financial Ratios" issued by the Danish Association of Financial Analysts. However, "Profit and loss from the sale of vessels, etc." is not included in EBITDA. Please see definitions in the section "Definitions of key figures and financial ratios" in the Annual Report for 2021. The figures are adjusted for the Company's holding of treasury shares.

⁵⁾ Figures are annualised.

COMMENTS ON THE DEVELOPMENT OF THE THIRD QUARTER 2022

Results

The profit for the third quarter of 2022 amounted to USD 243 million (USD 65 million) of which profit from vessel sales amounted to USD 20 million (USD 13 million).

For the first nine months of 2022, profit amounted to USD 539 million (USD 82 million) of which profit from vessel sales amounted to USD 48 million (USD 4 million).

Both depreciations and financial expenses increased significantly compared to 2021, which is mainly due to IFRS 16 lease accounting as more timecharter vessels are being recognised as right-of-use assets and lease liabilities respectively.

Cash flows & liquidity

Cash flow from operating activities during the third quarter of 2022 was USD 399 million (USD 154 million) driven by the strong profitability and a positive change in working capital, which was mainly due to settlement of positive fair value adjustments on cash flow hedges. For the first nine months of 2022, cash flow from operating activities was USD 901 million (USD 89 million).

As of 30 September 2022, NORDEN had available liquidity of USD 833 million, which consisted of USD 683 million in cash and cash equivalents supplemented by USD 150 million in undrawn credit facilities.

Equity and capital allocation

Equity amounted to USD 1,323 million as of 30 September 2022 compared to USD 993 million at the end of 2021. The development is mainly due to the result for the period and positive fair value adjustments of cash flow hedges offset by dividends paid and acquisition of treasury shares.

The strong profit for the period increased the annualised return on equity to 64% for Q3 2022 (27%). For the first nine months of 2022 the annualised return on equity was 58% (13%).

The Board of Directors has decided to pay out an interim dividend of DKK 30 per share. The interim dividend will be paid on 9 November 2022 and will count as part of the dividend policy of paying out minimum 50% of the net full-year result. The ex-dividend date for the interim dividend will be 7 November 2022. In addition, NORDEN will initiate a share buyback programme of USD 50 million, which will run until February 2023.

MARKET DEVELOPMENTS

Dry cargo market

- **Market development and spot rates**

The decline in the dry cargo market was exacerbated during the quarter, as expected. Despite strong coal volumes, global commodity volumes transported grew less than the global supply of vessels. Congestion levels lessened, with reduced supply chain pressure in line with less Covid-19 related restrictions in general. Inefficiencies following the war in Ukraine lead to longer distances, to some extent making up for lower congestion. Average Supramax spot rates declined by 32% from USD 28,900 to USD 19,700.

- **Period rates and asset prices**

The 1-year T/C rates for Supramax vessels decreased by 43% from USD 25,250 to USD 14,500 per day as forward projections continue to drop. Asset prices for 5-year old Supramax vessels declined by 12% to USD 28 million.

- **Market outlook**

A slowdown in the world economy is expected in line with widespread market uncertainty. The dry cargo market is therefore expected to face further headwinds, compounded by less container market spillover effect and lower growth in global commodity volumes transported. Chinese trade levels expected to improve, but will not offset overall market developments.

Product tanker market

- **Market development and spot rates**

The product tanker market continues to exhibit extreme volatility across regions in the ongoing wake of the war in Ukraine and sanctions on Russian trade. Longer voyage distances and market inefficiencies result in soaring daily rates, with average MR spot rates further increasing by 15% to USD 47,500 in Q3. Refineries operating at high capacity, and demand for refined oil is used for direct consumption rather than restocking.

- **Period rates and asset prices**

The 1-year T/C rate for MR Eco vessels increased by 25% to USD 28,900 per day at the end of Q3. Asset prices for 5-year MR vessels increased by 21% to USD 43 million at end Q3.

- **Market outlook**

The base case for product tankers is that market conditions remain strong for the rest of 2022 moving into 2023. This is supported by longer distances and ongoing regional volatility. The full effect of already issued sanctions on Russia is expected to add to this once enforced at the end of 2022 and early 2023, further supporting high and volatile rates. However, risks to the strong base case outlook remain high due to both political uncertainty and a weakening economic outlook.

ASSETS & LOGISTICS

TANKER PORTFOLIO DRIVING UP NET ASSET VALUE

Results

- Assets & Logistics generated a profit of USD 53 million for the quarter (USD 8 million) with sales gains of USD 20 million.
- Considerable increase in the net asset value (NAV) of the business unit portfolio (including NORDEN's net cash position) to USD 2,019 million or DKK 446 per share. This in addition to issuing a dividend of DKK 30 per share. The increase amounts to USD 151 million or DKK 69 per share, driven primarily by higher tanker values, where the leased vessel and cover portfolio (including options) alone has doubled in value.
- Market value of both owned and leased vessels at USD 1,421 million at the end of Q3. The market value of owned vessels exceeded book values by USD 202 million.

Net asset value of Assets & Logistics¹⁾

Amount in USD million	Dry Cargo	Tankers	Total
Market value of owned vessels	327	594	921
Estimated market value of leased vessels & cover portfolio ²⁾	305	195	500
Total Assets & Logistics portfolio value	632	789	1,421
Net cash position			377
Newbuilding instalments			-50
Other net assets (book values)			271
Total business unit NAV			2,019
Business unit NAV per share, DKK			446
Market value of owned vessels vs. carrying amounts	57	145	202

Owned vessels in portfolio values and portfolio overview are excl. owned vessels from financial leasing transactions. NAV per share based on USD/DKK rate and share count as of balance sheet at end Q3, excluding treasury shares held by NORDEN.

Business highlights

- Strong dry cargo earnings and downside protection.
 - Profitable dry cargo cover, and fully covered for 2022-2023.
 - Selling vessels ahead of weakening market.
 - Declaring vessel purchase options with high spread.
- Maintained high tanker exposure, generating value for 2023.
 - Leasing out and selling tanker vessels at elevated rates and price levels.
 - Increasing coverage for 2023 at higher rates.
- Future vessel sales gains for 2023 of approx. USD 19 million.

FREIGHT SERVICES & TRADING

SUBSTANTIAL EARNINGS IN TWO VOLATILE MARKETS

Results

- Profit of USD 190 million in Q3 2022 (USD 57 million), best ever quarterly result.
- Result per vessel day at USD 4,583 in Q3, increasing average margin per vessel day since 2019 to USD 1,253.
- Stable year-on-year activity compared to Q3 2021.

Result per vessel day

2022 figures based on year-to-date profit and number of vessel days.

Business highlights

- Capturing exceptional value in weakening dry cargo market.
 - Generating high margins from short position (more cargoes than tonnage), benefitting from decreasing freight rates.
 - Currently maintaining short position in 2022 and neutral exposure for 2023.
- Strong margins from maintained long position (more tonnage than cargoes) in extraordinary product tanker market.
 - Actively trading across world regions through arbitrage to capture value amid large regional rate volatility.
 - Tanker pool earnings markedly above market average.
 - Gradually starting to ease tanker exposure.
- Enhanced operational margins from cost efficiencies, optimal voyage scheduling and improved fuel efficiency.
- Strengthening global office network by opening Tokyo office to enhance and grow business with Japanese cargo owners.
- Relaunch of NORDEN Tanker Pool, offering clients added member services and attractive pool earnings.

OUTLOOK FOR 2022

Guidance

In line with the guidance announcement in October, NORDEN expects profit for the year in the range of USD 650-730 million. This is based on high exposure towards substantially increased product tanker market rates, very strong short-term positioning towards a weakening dry cargo market, high long-term dry cargo cover at profitable rates and active asset trading.

Assets & Logistics

The Assets & Logistics business unit expects much better earnings in 2022 compared to 2021, based on high coverage on the dry cargo portfolio at profitable rates. In addition, a number of dry cargo vessel sales gains will contribute positively to the result.

Freight Services & Trading

The Freight Services & Trading business unit expects a net result significantly above the combined result for the two operators in 2021. The expectation is based on a margin per vessel day more than double the record level from 2021 (see table on page 7). The business unit remains well positioned in its short-term exposure to capitalise on a weakening dry cargo market, while generating high margins from a significantly improved and volatile tanker market.

Seasonality and uncertainty

Given the war in Ukraine, full effect of sanctions on Russia, remaining COVID-19 disruption and macroeconomic uncertainties in general, the freight market uncertainty and volatility is expected to remain high. With an agile business model and strong operating platform, NORDEN is well-equipped to manage this uncertainty and adjust exposure accordingly.

Events after the reporting date

No significant events have occurred between the reporting date and the publication of this annual report, which have not already been included and adequately disclosed in the quarterly report, and which materially affect the assessment of the Company's and Group's results of operations or financial position.

“NORDEN expects profit for the year in the range of USD 650-730 million”

Forward-looking statements

This interim report contains certain forward-looking statements reflecting Management's present judgement of future events and financial results. Statements relating to 2022 and the years ahead are inherently subject to uncertainty, and NORDEN's realised results may therefore differ from projections. Factors that may cause NORDEN's realised results to differ from the projections in this report include, but are not limited to: Changes to macroeconomic and political conditions - particularly in the Group's principal markets; changes to NORDEN's rate assumptions and budgeted operating expenses; volatility in freight rates and tonnage prices; regulatory changes; counterparty risks; any disruptions to traffic and operations as a result of external events etc.

STATEMENT BY THE BOARD OF DIRECTORS AND EXECUTIVE MANAGEMENT

The Board of Directors and the Executive Management have today reviewed and approved the Interim Report for the period 1 January to 30 September 2022 of Dampskibsselskabet NORDEN A/S.

The interim consolidated financial statements of Dampskibsselskabet NORDEN A/S have been prepared in accordance with IAS 34 Interim Financial Reporting as adopted by the EU and additional Danish disclosure requirements for interim financial reporting of listed companies.

The interim consolidated financial statements have not been subject to audit or review by the Independent Auditors of Dampskibsselskabet NORDEN A/S.

We consider the accounting policies applied to be appropriate and the accounting estimates made to be adequate. Furthermore, we find the overall presentation of the Interim Report to present a true and fair view.

Besides what has been disclosed in the Interim Report, no other significant changes in the Group's risks and uncertainties have occurred relative to what was disclosed in the consolidated annual report for 2021.

In our opinion, the interim consolidated financial statements give a true and fair view of Dampskibsselskabet NORDEN A/S' consolidated assets, equity and liabilities and the financial position at 30 September 2022 as well as the result of

Dampskibsselskabet NORDEN A/S' consolidated activities and cash flows for the period 1 January to 30 September.

Furthermore, in our opinion the Management Review gives a fair representation of the Group's activities and financial position as well as a description of the material risks and uncertainties which the Group is facing, relative to the disclosures in the Annual Report for 2021.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of preparation and changes to NORDEN's accounting policies

1.1 Basis of preparation

The interim consolidated financial statements for the 9 months ended 30 September 2022 have been prepared in accordance with IAS 34 Interim financial reporting as adopted by the EU and additional Danish disclosure requirements for the interim financial reporting of listed companies.

The interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual consolidated financial statements for the year ended 31 December 2021.

The accounting policies, judgements and estimates are consistent with those applied in the consolidated annual report for 2021, apart from changes described below.

1.2 Changes in accounting policies and disclosures

The Group has adopted standards and interpretations effective as of 1 January 2022. The Group has not early adopted any other standard, interpretation or amendments that have been issued but are not yet effective.

Adoption of new or amended IFRSs

NORDEN has implemented amendments and interpretations to existing standards effective as of 1 January 2022. None of these interpretations or amendments have had any significant effect on the accounting policies applied by NORDEN.

For a complete description of accounting policies, see the notes to the consolidated financial statements for 2021, pages 76-114 in the consolidated annual report for 2021.

Standards not yet in force

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's consolidated financial statements. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

New and amended financial reporting standards are either irrelevant or insignificant to NORDEN.

Significant accounting estimates and judgements

The accounting estimates and judgements, which Management deems to be significant to the preparation of the consolidated financial statements, are impairment test and non-lease component for leases under IFRS 16 Leases. Reference is made to note 1.4 "Significant accounting estimates and judgements" on page 79 for a further description in the consolidated annual report for 2021.
